

IMPORTANCE OF EDUCATION FOR CHILDREN

-NEERANJANA

V-K (Model School)

An American social reformer and writer, Fredrick Douglass once wrote “It is easier to build strong children than to repair broken men”.

Education gives strength to the children to become strong and be successful in future. It is so much important in a child’s life that it marks the foundation of his success later in life and decides on whether he will turn out to become a happy and content adult or an emotionally shattered and depressed individual.

A nation which doesn’t spends much on child education; forever, remains in the grasp of poverty and misery not only suffering today but also destroying its tomorrow. A child is the key to the success of a nation and education is the key to success of a child .It is very important tool for everyone to succeed in life and get something different. It helps a lot in lessening the challenges of life. Knowledge gained throughout the educational period enables each and every individual confident about their life. It opens various doors of opportunities in achieving better prospects in life.

Education develops the people’s minds to a great level and helps in removing all the differences in the society. It makes us able to become a good learner and understand every aspect of life.
