My Hobby

Everyone of us has some kind of liking or disliking for certain things in life. Similarly I love drawing because drawing do not cost much and is always fun. Drawing is my favorite hobby. I can not imagine a colourful life without drawing. My greatest inspiration is my mother who always encourages me to design her dresses. It is my believe that to display your art, you do not have to be great artist. So get your paint, brush and pencil and start drawing. Drawing is a way for me to show my creativity. I can never feel bored when I have my colours with me. My colours are my best friend. I like drawing since six years old. Drawing has become the most important part of my life.
