MODEL WING

My Hobby

Everyone of us has some kind of liking for certain things in life .I love drawing, colouring and art and craft. These are my favorite hobbies .I cannot imagine a colourful life without drawing, colouring and art work. I cheer myself up by drawing something so that I can make myself happy.

I never feel bored when I have my colours , modeling clay etc. with me. I like to make things around look realistic through my modeling activity. I observe the things around me and draw it on a piece of paper such as houses, humans, animals, plants, nature etc. I also love to involve in activities like dancing, acting and paper works. An indifferent thing about my hobby is that nobody taught me how to make things. I learnt it by myself and later got inspiration, motivation and encouragement from my parents. I am constantly practicing to retain my hobby.

I have decorated my house with a lot of my art works and drawings. I usually gift my art works to my parents, brother, cousins, my grandmother and my friends on occasions like birthdays, wedding anniversaries etc.

I love my hobby because it allows me to express myself. It increases the creativity, imagination, fun, enjoyment etc.

Above all I stay away from TV and iPad .And hence I utilize my time wisely and purposefully. My message to fellow students is “Develop a Hobby”.
